Barbu Manuela-Florentina

D) Get the average city population by state.

```
us_zips>
{
  $geoNear: {
    near: { type: "Point", coordinates: [-74.044582, 40.689247] },
    distanceField: "distance",
    maxDistance: 200000,
    minDistance: 50000,
    spherical: true,
    query: { population: { $exists: true } }
  },
  $group: {
    _id: null,
    totalPopulation: { $sum: "$population" }
  }
}
us_zips>
```

es 41.878876, -87.635918.

Statue of Liberty at coordinates 40.689247,

nce of your indexes so be prepared to

geospatial query operators.

4. Solution Delivery

Upload your final project solution to the designated area in the virtual campus.
